

DEDICATION

This work is dedicated to almighty God for his guidance and grace throughout the period of my industrial training and also to my parents **Mr and Mrs Ishmael Egwuatu** for their love, care and trust throughout this period and most especially for their financial supports during the industrial training.

ACKNOWLEDGEMENTS

My appreciation goes to God almighty for his grace and guidance throughout my industrial training program. I want to appreciate the commissioner of MINISTRY OF PUBLIC UTILITIES AND WATER RESOURCES, The Director of Water Recourses Department. I also appreciate all the staff of the water resources department. I also want to appreciate my industry based supervisor MR CHIKA NDIFE for taking his time to impart knowledge of hydrogeology, surface water prospecting, borehole drilling, water treatment to mention but a few to me and helping me bridge the gap between theory and practical – and to my institution based supervisor MRS. OGECHUKWU ARIBODOR and all the workers at MINISTRY OF PUBLIC UTILITIES AND WATER RESOURCES . May God shower his blessings on you all. Also, a special thanks to my IT colleagues both the ones from and other schools. My thanks also go out to my lecturers and indeed all student and staff of this institution. Lastly, I thank my parents Mr and Mrs Ishmael Egwuatu, my family, friends and well-wishers for their support. I appreciate you all.

TABLE OF CONTENTS

Title Page	i
Dedication	ii
Acknowledgments	iii
Table of Contents	iv
Table of figures	vii
Abstract	ix
CHAPTER ONE: INTRODUCTION	1
1.1 Definition of SIWES	1
1.2 History of SIWES	1
1.3 Aims and Objectives of SIWES	2
1.4 Industrial Training Fund	3
1.5 Description of Workplace	3
1.6 Professional services rendered	5
1.7 Aims and Objectives of Department	5
1.8 Organizational Chart	6
CHAPTER TWO: LITERATURE REVIEW AND GROUNDWATER OVERVIEW	7
2.1 Hydrology	7
2.2 Hydrologic Cycle	7
2.3 Ground water occurrence	8
2.4 Types of Aquifer	8
2.5 Water well	9
2.5.1 Difference between a Borehole and a Well	10
2.6 Ground water exploration	10

2.7	Geophysical Survey	10
2.8	Geophysical Method	10
2.8.1	Electrical Resistivity Method	11
2.9	Groundwater Exploitation	13
	CHAPTER THREE: KNOWLEDGE ACQUISITION AND ACTIVITIES CARRIED OUT	14
3.1	Borehole	14
3.2	Location of borehole site	14
3.3	Preliminary drilling activities	14
3.3.1	Vertical Electric sounding (VES)	14
3.3.2	Results and Data interpretation	16
3.3.3	Case study of survey carried out	17
3.3.4	Results and Interpretation	18
3.3.5	Analysis	20
3.3.6	Recommendations from the Interpretation	20
3.3.7	Preparations of Bill of Quantity/Bill of Engineering Evaluation (BOQ/BEME)	22
3.3.8	Mobilization of Equipment and Personnel to site	22
3.3.9	Site Preparation	22
3.4	Drilling method	23
3.4.1	Borehole drilling Equipment	23
3.4.2	Drilling Chemicals and their uses	31
3.5	Post drilling activities	32
3.5.1	Well Completion	33

3.5.2	Well Development	35
3.5.3	Well Stabilization	36
3.6	Pumping Test Analysis	36
3.6.1	Important parameters in Pumping Test	36
3.6.2	Equipment used in pumping test	37
CHAPTER FOUR: KNOWLEDGE GAINED ON SURFACE WATER SCHEME		38
4.1	Surface Water Occurrence	38
4.2	Surface water scheme components/phase	38
4.3	Surface water exploration	39
4.4	Surface water exploitation	39
4.5	Surface water processing/treatment	40
4.6	Surface water storage and distribution	42
4.7	Water management and management structure	43
4.8	Factors to consider before setting up a surface water project	46
4.9	Challenges to surface water scheme project	46
4.10	Surface water sustainability plans	46
CHAPTER FIVE: SUMMARY, CONCLUSION, AND RECOMMENDATION		48
5.1	Summary	48
5.2	Conclusion	48
5.3	Recommendation	49
	References	50
